

Pocket Measure: reference card

ArUco dictionary: DICT_4X4_50 | Marker ID: 0

Outer black square: 100 x 100 mm | A4 paper

PRINT AT 100% / ACTUAL SIZE. Turn off Fit / Shrink to page.

Use matte white paper. Keep the entire black square and white margin.

Before measuring

1. Measure the black-square width AND height with a physical ruler.
They must match. Enter the measured side, not the nominal print size.
 2. Lay the sheet flat. Put thin, flat items beside it, not on top of the marker.
 3. Keep all four marker corners visible; avoid glare, blur and extreme angles.
 4. Prefer the normal 1x camera. Keep the card close to the measured item.
 5. In Pocket Measure, choose the saved photo, confirm size and tap two ends.
- Measurements apply to the marker plane; raised points can introduce error.
